PROFESSIONAL SUMMARY

Informatics Engineering student with over 4 years of industrial logistics operations experience at PT Multi Indomandiri (Wings Group), combined with strong technical proficiency in software development, computer vision, and modern cross-platform engineering. Proven entrepreneurial initiative through the design, development, and live deployment of an independent commercial property platform (Kosan Murah PT MIM). Skilled in translating real-world operational workflows into robust, structured digital solutions, optimizing operational accuracy, and managing relational databases.

Key Skills: Python, React Native, OpenCV, Computer Vision, JavaScript (ES6+), Tailwind CSS, SAP ERP (Logistics/WM), Warehouse Operations, Outbound Logistics, Stock Opname, Relational Database & SQL, Git & GitHub, Problem Solving.

WORK EXPERIENCE

PT. MULTI INDOMANDIRI (WINGS GROUP) | CHECKER OUTBOUND & LOGISTICS OPERATIONS | 2019 – 2023

- Managed and validated warehouse inventory movements, outbound shipments, and stock records using the **SAP ERP System** with high data precision.
- Processed and verified Delivery Orders (DO), picking lists, and outbound cargo inspections to ensure **100% compliance** with logistics manifests.
- Operated industrial material handling equipment (Forklift) in strict compliance with standard operating procedures and warehouse Occupational Health & Safety (K3) regulations.

KOSAN MURAH PT MIM | OWNER & FOUNDER (COMMERCIAL PROPERTY PLATFORM) | 2024 – PRESENT

- Led end-to-end management of rental property units in Karawang industrial area, overseeing operations, facility maintenance, and tenant financial records.
- Developed and launched a dedicated commercial web application (https://kosan-mim.vercel.app/) integrated with verified Google Business Profile to drive digital bookings and inquiries.

PT. ALBANY CORONA LESTARI | STORE OPERATIONS & CASHIER CREW | 2024

- Handled retail POS transactions, customer service, cash management, and merchandise display according to standard operating retail guidelines.
- Executed regular stock opname and inventory audits, maintaining physical and system inventory reconciliation accuracy approaching 100%.

KEY PROJECTS & TECHNICAL INITIATIVES

FACE RECOGNITION BIOMETRIC SYSTEM | COMPUTER VISION & PYTHON | 2026

- Developed an automated biometric identity verification and attendance system leveraging Computer Vision techniques (Python, OpenCV, Dlib).
- Implemented real-time **68 facial landmarks extraction** and face embedding matching, achieving up to **99.4% verification accuracy** across variable lighting conditions.

CROSS-PLATFORM MOBILE APPLICATION | REACT NATIVE & EXPO | 2026

- Built a high-performance native mobile portfolio application (Android/iOS) featuring modular architecture and reactive state management.
- Engineered interactive biometric laser scanning simulation, dynamic dark/light theme switching, and spring-physics animations running at 60 FPS.

POINT OF SALE (POS) & INVENTORY SYSTEM | FULLSTACK WEB & SQL DATABASE | 2025

- Designed an integrated cashier application and stock control system for retail transaction management, automated receipts, and inventory tracking.
- Structured a normalized relational database schema to prevent data discrepancies and ensure seamless multi-item retail checkout.

EDUCATION

UNIVERSITAS SEHATI INDONESIA | BACHELOR OF INFORMATICS (S1 TEKNIK INFORMATIKA) | 2024 – PRESENT

- Active 5th-semester undergraduate student. Focus on Software Engineering, Computer Vision / AI, Relational Databases, and Mobile Systems.

SMAN 1 KLARI | NATURAL SCIENCES (IPA) | 2016 – 2019

- Graduated with a strong academic foundation in Mathematics and Natural Sciences.
